DETAILED ACTION

Allowable Subject Matter

1. Claims 1-5 and 10-14 (renumbered 1-10) are allowed. The following is an examiner's statement of reasons for allowance:

The closest prior art of record is Mitsutake (US 6,803,715). As correctly argued by applicant, the method of US '715 fails to form a space between the plate spacer and the first substrate after the process of fixing the plate spacer to the first substrate and before the process of bonding the first substrate and the second substrate together. The "space" depicted in Figure 6 of US '715 is a result of using a spacer that is warped and raised at its longitudinal center (Column 11, Lines 40+). Thus, the "space" formed in US '715 occurs simultaneously with fixing the plate spacer to the first substrate, **not after such a step**. Additionally, that portion of the spacer that is not in contact with the first substrate in Figure 6 was not initially in contact with the first substrate as required by the claimed invention. Thus, the prior art references of record failed to suggest, disclose, or teach the claimed method.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
